Blood Bands & Forms

According to the FDA, there is an average of 414 transfusion errors in the U.S. each year, or about one per 38,000 transfusions. Match the right patient to the right blood every time with PDC Healthcare's Blood Bands and Forms, which use alpha and numeric serialization for positive identification.

Securline® Hybrid Bar Code Blood Bands: Use bar code and serialized alphanumeric codes to automatically match the right patient to the right blood. Provides superior scanability, safety, and security.

Securline® Hybrid Blood Band and Blood Band Plus: Soft tri-laminate wristband features 23 easy-peel labels and tamperproof SecurSnap® closure for maximum safety. Blood Band Plus features a peel-off adhesive tail that applies to draw tubes.

Ident-A™ Blood Recipient System: To help ensure that proper ID procedures are followed, this system includes crossmatch reports, along with wristbands with pre-numbered insert cards, label sheets and requisition forms.

Securlink® Blood Recipient System: Links the patient, transfused blood, and all related paperwork to assure safe and complete blood transfusion. Choose from the full system containing Blood Bands and Securlink® Forms or order bands and forms separately.

Blood Bands & Forms provide medical-grade quality for maximum durability, safety, and security.

Blood Bands & Forms help healthcare organizations meet applicable patient safety regulatory guidelines, including:

- **The Joint Commission National Patient Safety Goals:** Identify Patients Correctly, Improve Staff Communication, Use Medicines Safely, Prevent Infection, Identify Patient Safety Risks, and Prevent Mistakes in Surgery.

- **Centers for Medicare & Medicaid Services (CMS):** Stage 2 meaningful use requirements to use assistive technologies with eMAR.

- **Health Insurance Portability and Accountability Act (HIPAA):** to protect patients' medical records and other health information.

- **American Health Association (AHA):** to prevent the chance of lost or transferred data.

- **Five Rights of Patient Safety:** to ensure right patient, medication, dose, time, and method.

Table of Contents

Bar Code Hybrid Blood Bands

- Larger font size
- Fits adults & pediatrics
- Patented dual-purpose, hybrid style lets you handwrite information or use with your LIS label
  - Standardize and consolidate to a single blood band, even if you have multiple labs
  - Downtime solution allows you to hand write information on the band as a back-up method
- Designed for inpatient or outpatient use
- Laminate shield protects patient information and bar code from water or solvents for accurate bar code scanning
- Advanced material resists moisture, alcohol and hand sanitizer to preserve bar code integrity for accurate scanning
- V-Notch™ patient ID label ensures proper placement on BD Vacutainer for bar code scanning and visibility of tube color
- Meets **The Joint Commission's National Patient Safety Goal** for blood transfusions for a one-person verification system!

Securline® Bar Code Hybrid Blood Bands help provide maximum safety and security!

Using bar code and serialized alphanumeric codes, the Securline® Bar Code Hybrid Blood Band accurately matches the right patient to the right blood, ensuring maximum safety throughout the blood transfusion process. It provides unrivaled scanability, safety, and security!

- Streamlines the blood transfusion process and improves patient safety by reducing human errors related to patient identification
- Saves time and money by streamlining the patient ID and blood transfusion workflow
- Integrates seamlessly with existing blood bank system so there's no IT involvement or capital investment
- Custom imprinting available

Custom imprinting available. Call (800) 435-4242 for details.
