Markers for Digital Imaging

Make accurate comparisons between life-size (what you see) and image size (what you get). Designed for Teleradiology and CR Imaging, where the image size does not always match the life-size of the anatomy.

The image of the unique ruler gives a visual and measurable cue as to the size of the screen image compared to the life size of the anatomy.

- Each marker has a 3cm lead ruler
- Color-coded: L-Blue / R-Red
- High density lead characters
