

COVID-19 Identification Resources from a Trusted Supplier

Supporting Change in Healthcare

PDC is here to support you as you continually adjust your protocols in response to the Coronavirus COVID-19 pandemic.

Throughout the COVID-19 pandemic, you can rely upon PDC for solutions that help you identify people, specimens, medications, and more throughout the continuum of care. As you resume elective surgeries and procedures and reopen outpatient sites, we're here to reinforce your supply chain.

We've pulled together the most relevant products that will help our customers manage COVID-19, including:

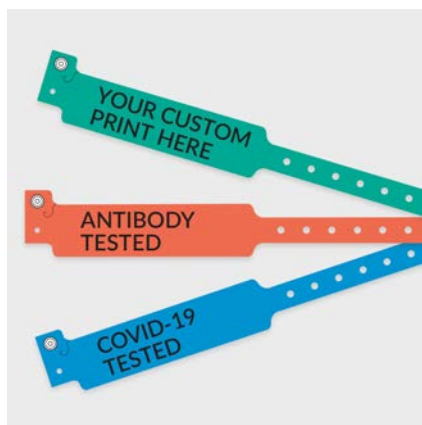

- Patient, Personnel, & Visitor Identification
- Contact & Droplet Precautions Labels
- Specimen & PPE Labeling
- Hospital Signage
- Cassette Covers & Personal Belonging Bags

Custom labels, wristbands and cards are also available to meet your communication needs and specific protocol requirements.

VIRAL SPECIMEN MONITORING

NEW Virus Specimen Transport (VST) & Storage Monitoring

Visual Indicator to Help Assure the Viability of Viral Specimens for Testing

The Timestrip® Virus Specimen Transport (VST) series provides a quality control resolution for proper transport and storage of clinical virus specimens to comply with required FDA and WHO monitoring guidelines.

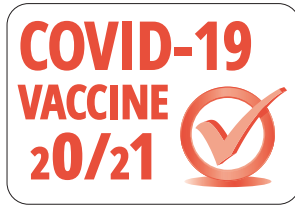

- A simple and reliable way to follow a virology testing kit's environmental conditions
- Provide a distinct indication if regulated limitations are breached
- An essential lab tool to correctly store and transport virus specimens to preserve their integrity and ensure meaningful test results

			
<p>TIMESTRIP® VST TTI</p> <p>Item Number VST-TTI</p>	<p>TIMESTRIP® VST 0°C</p> <p>Item Number VST-TEMP-0</p>	<p>TIMESTRIP® VST 53°C</p> <p>Item Number VST-TEMP-53</p>	<p>TIMESTRIP® VST FRIDGE COMBO</p> <p>Item Number VST-TIMETEMP-728</p>
<p>Integrates the time and temperature history of a virus specimen to indicate its accumulated effect on a virus specimen during transport and storage.</p>	<p>Detect thawing events during the shipment and storage of frozen virus specimens.</p>	<p>Monitor the exposure of virology specimens to extreme heat in transport and storage.</p>	<p>A combined indicator of time since collection and temperature breach during virus specimen transport and storage.</p>
<p>Integrates thermal response.</p>	<p>0°C / 32°F</p>	<p>53°C / 127°F</p>	<p>Temperature breach 8°C / 46°F and 72 hours.</p>
<p>This unique, visual indicator offers a clear indication of temperature abuse, as well as the cumulative time of abuse that affects the virus in the specimen.</p> <p>The VST TTI provides a visual indication that the specimen stability may be impacted.</p>	<p>Global regulations require the transport of specimens to the lab soon after collection or within 72 hours if placed in chilled conditions. Where there is likely to be a delay, it is advised to freeze specimens.</p> <p>This smart label records if frozen virology specimens have been thawed during or after transportation.</p>	<p>Although viruses are highly stable at chilled temperatures, it was reported that when exposed to temperatures above 50-55°C Coronavirus specimens become non-infectious within hours.</p> <p>Timestrip VST 53°C monitors the required extreme hot temperature limitations.</p>	<p>Global regulations require use of a temperature-controlled transport system to maintain sample viability for testing.</p> <p>This exclusive combined solution has a unique indicator to measure the lapse of time since virus samples were collected, as well as a temperature breach element to indicate if samples are no longer in fridge conditions.</p>

HANDWASHING TECHNIQUE
TECNICA PARA LAVARSE LAS MANOS

1. Use continuously running water.
2. Use a generous amount of soap.
3. Apply with vigorous contact on all surfaces of hands.
4. Wash for a minimum of 15 seconds.
5. Clean under and around fingernails.
6. Keeping your hands down rinse them well with warm running water.
7. Avoid splashing.
8. Dry well with paper towels.
9. Use a towel to turn the water off.
10. Discard the towels into a bag provided for that purpose.

1. Use agua que corra continuamente.
2. Use bastante jabón.
3. Aplique con contacto vigoroso a todas las partes de la mano.
4. Lavarse por 15 segundos mínimo.
5. Lávese las manos.
6. Mantenga las manos para abajo para que el agua escurra dentro del lavabo y no a los brazos.
7. Evite salpicar, enjuaguese completamente.
8. Séquese bien con toallas de papel.
9. Use una toalla de papel para cerrar la llave del agua.
10. Ponga las toallas en la bolsa provista para ese propósito.

PRECAUTION LABELS

CONTACT PRECAUTIONS

(In addition to Standard Precautions)

Visitors — Report to Nurses' Station Before Entering Room

1. Private Room – When a private room is not available, cohort with patient(s) who has active infection with the same microorganism but with no other infection.

2. Gloves – wear gloves when entering room. Change gloves after contact with infective material. Remove gloves before leaving the patient's room.

3. Wash Hands – with antimicrobial agent immediately after glove removal and before leaving patient's room.

4. Gown – wear when entering room to protect clothes from items in the patient's room or if the patient has any of the following: • **Incontinent** • **Diarrhea** • **Colostomy** • **Ileostomy** • **Wound Drainage not contained by a dressing**
Remove gown before leaving the patient's environment.

5. Transport – Limit the movement/transport of patients from room to essential purposes only. During transport, ensure that all precautions are maintained at all times.

6. When possible, dedicate the use of noncritical patient care equipment to a single patient. If common equipment is used, clean and disinfect between patients.

59701469 – Fl. Green (R)

CONTACT PRECAUTIONS

59701475 – Fl. Green (R)

DROPLET PRECAUTIONS

(In addition to Standard Precautions)

Visitors — Report to Nurses' Station Before Entering Room

1. PATIENT PLACEMENT

Private Room. When a private room is not available, cohort with patient(s) who has active infection with the same microorganism but with no other infection. Maintain spatial separation of at least 3 feet from other patients and visitors if cohorting or private room is not available.

2. RESPIRATORY PROTECTION

Mask required when working within 3 feet of patient (or when entering room). Check your hospital's policy.

3. PATIENT TRANSPORT

Limit the movement/transport of patients from room to essential purposes only. During transport, **place surgical mask on the patient, if possible.**

59701467 – Fl. Orange (R)

DROPLET PRECAUTIONS

59701474 – Fl. Orange (R)

These steps are recommended by the CDC to reduce the risk of transferring microorganisms through direct contact with a patient and to reduce the risk of contact with large-particle droplets. The signs are placed outside the patient's door to warn visitors and staff of necessary steps to reduce the spread of disease.

PERSONNEL IDENTIFICATION

As staffing needs continuously change to meet the demands of each community, PDC has a full personnel identification portfolio to meet your needs, including: badge cards, lanyards, badge reels, and badge holders.

Browse the full portfolio at Identocard.com

ID Badge Cards

Every healthcare employee must have an identification badge that's easily visible and communicates essential information.

Custom Sample

Lanyards

These lanyards keep employee ID visible and accessible at all times. They can be customized to make a positive impression with your hospital's brand.

Custom Samples

Badge Reels

Retractable badge reels make it easy to repeatedly scan employee credentials while keeping employee ID visible at all times. They can be customized to make a positive impression with your hospital's brand. The B Reel Badge Reels also ensure employee badges remain facing forward.

Custom Samples

Badge Holders

With increased needs for sanitizing frequently touched surfaces, PDC offers flexible and rigid badge holders that can withstand repeated sanitizing while protecting ID badges.

Flexible Custom Samples

Rigid Custom Samples

ESSENTIAL WORKER PARKING HANG TAGS

Parking hang tags serve as permits to identify vehicles that are authorized to park on the premises. They are durable and feature a convenient cutout that allows each permit to hang from a rearview mirror, making it easily visible.

“Essential” Write-On IDentiPak™ Hang Tags

Write-On. Blank space allows for custom sequence numbering or identifier. Surface of the tag is writable with a permanent marker.

HTIP-Essential

“Essential” Inkjet/Laser Printable JetPak™ Hang Tags

- Durable, professional parking hang tag created in seconds with an easy two-piece system
- Create and customize a fully finished tag by printing with your inkjet or laser printer, popping out the pre-cut sheet, and running the pouch through a laminating machine
- Kit comes with printable inserts and 100 laminating Jetpak pouches

HTJP-Essential

“Essential” Classic Template IDentiPak™ Hang Tags

Customize our classic template hang tag. Choose your background color, add your logo, and define your numbering system.

HTIP-EssentialB

“Essential” Custom IDentiPak™ Hang Tags

We can also help you create a one-of-a-kind design, or you could provide us your completed artwork.

VISITOR IDENTIFICATION & MANAGEMENT

PassagePoint Visitor Management System

The COVID-19 pandemic has accelerated the move toward a more modern approach to visitor management. Changes to visitor policies during the pandemic could serve as a catalyst for installing new policies and security measures permanently.

PassagePoint is a flexible, easy to implement, and complete visitor management system that enables hospitals to control visitor access to improve safety and security.

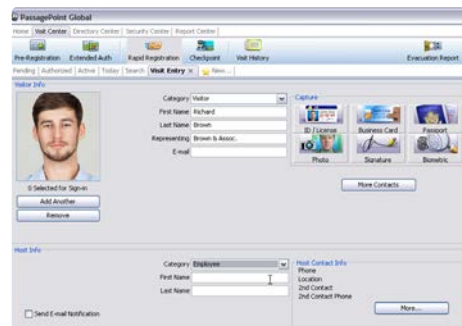

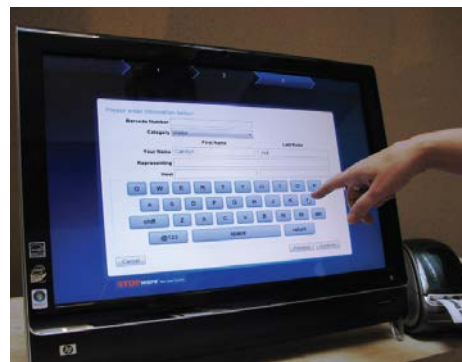

- Manage patient-specific restrictions with watch lists and personalized protocols
- Configure to screen visitors with COVID-19 questions and a temperature scan
- Integrate with ADT messaging to manage patient visitation restrictions
- Pre-screen visitors and employees without using valuable human resources and set up self-registration workstations
- Collect visitor data and produce standard or custom automated reporting. Enables contact tracing.
