

# Introducing **NEW** Spee-D-Mark™ 3D Breast Tomo Markers

## Clear Identification. Clear Savings.

3D Breast Tomo Markers from PDC are used for 3D Digital Breast Tomosynthesis (Tomo).

These low-density markers are designed to show up clearly when “in slice,” and minimize the “slinky” artifact when they’re out of slice.

PDC offers breast health professionals the ability to choose the marker that best fits their needs

**NEW** Spee-D-Mark™ 3D Soft Mark

### Less Bright Marker

- Displays least amount of slinky artifacts
- Reduces opportunity for missed abnormalities
- Least amount of distortion and obscuring

Spee-D-Mark™ 3D

### Brighter Marker

- Designed to appear in more slices to document location of areas of concern in deeper planes
- Highlights without hiding critical breast tissue
- Compatible with both 2D and 3D technologies

No matter your choice, Spee-D-Mark™ 3D Breast Tomo Markers provide you with a high-quality marker at a lower price.

- » Costs substantially less than the leading competitive brand
- » Contracted with most national GPOs
- » Available through distribution partners
- » No minimum order required

# Spee-D-Mark™
