

LABORATORY ID SOLUTIONS & SUPPLIES

Safe. Efficient. Compliant.

PATIENT SAFETY STARTS WITH POSITIVE IDENTIFICATION

PDC laboratory solutions accurately identify patients, specimens, blood units, and more to help labs with:

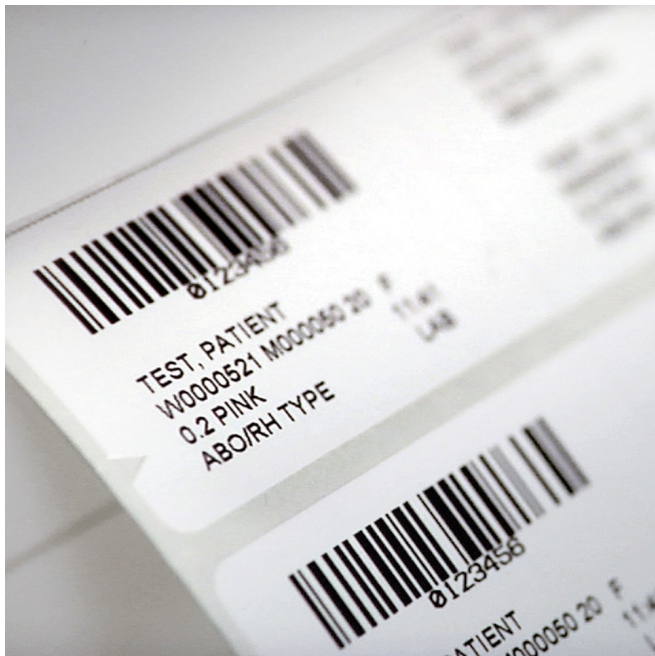

- Patient Safety
- Specimen Error Reduction
- Workflow Efficiency
- Clear Communication
- Regulatory Compliance
- Supply Chain Consolidation

Over **90% OF HOSPITALS** rely upon PDC products:

- A trusted manufacturer and leader in identification and patient safety solutions
- **60+ YEARS** of healthcare experience
- Unmatched product breadth and superior service

MEDICAL GRADE SPECIMEN LABELS Customizable

Rigorously Tested to Reduce Label Errors

PDC medical grade labels reduce labeling errors, assure accurate and lasting identification of specimens and blood samples, and increase patient safety.

32 HOUR, 12 POINT testing to ensure top performance

Compatible with leading LIS, such as Cerner, Epic, SunQuest, MediTech and SoftLab, and thermal printers

Compatible with **POINT OF CARE LABELING SYSTEMS** — enables barcode scanning and wireless mobility for convenient, positive patient identification

COMMUNICATION LABELS Customizable

Highly Visible to Command Attention – Over 500 Color/Size Combinations

Clearly communicate patient, medication, specimen and other information within the lab and between departments.

Thousands of pre-printed options to help you communicate, comply, identify, and organize to keep your lab running efficiently

Bright colors and easy-to-read text

Customizable to communicate your exact message or fit your specific size requirements

V-NOTCH® SECONDARY LABELS Customizable

Reduce Relabeling by up to 80% with Easy Alignment Guides

Provides correct and consistent label placement on BD Vacutainer® Plus Collection Tubes

Ensures accurate identification with aligned labels that scan easily and won't peel off unintentionally

Mislabeled or inconsistent barcoding can compromise patient safety, increase lab and hospital costs, and waste valuable staff time and resources.

The V-shaped notch aligns with the color-coded notch and sidebar to make labeling easier for clinicians.

“Prior to using V-Notch, our staff was forced to re-label more than 90% of our test tubes. Now that we’re using V-Notch, we’re re-labeling fewer than 10%. Plus, we’re experiencing significant time and cost savings.”

– Barbara Bush, Laboratory Manager,
University of Kentucky

V-Notch feature available on most stock label solutions and can be added to any custom label. Talk to our team today.

Use our Best Dressed Lab Tubes poster to help educate your organization on proper specimen labeling.

BLANK & PRE-PRINTED BLOOD LABELS Customizable

Meet ISBT 128 Labeling Standards

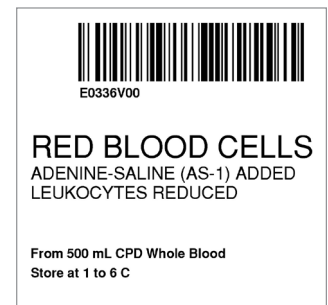

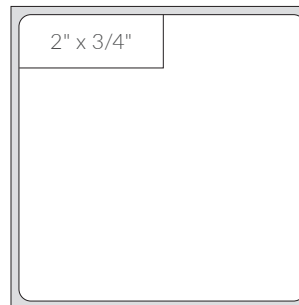

Available in single quadrant, double quadrant, and full-face configurations

Precisely sized to run easily through your thermal printer – compatible with leading thermal printers

Produce accurate barcodes and easy-to-read information

Uses FDA approved adhesive to apply directly onto blood bags — tested in standard temperature ranges

BLOOD TEMP 10 TEMPERATURE INDICATOR

Easy-to-Use Visual to Ensure Blood Transportation Compliance

Timestrip® Blood Temp 10 enhances your existing quality control process for blood transportation. It monitors real-time temperature of the blood and clearly indicates when 10° C temperature has been breached.

Ensure regulatory compliance with the AABB Standards for Blood Banks and Transfusion Services and the FDA's CFR 600.15(a) for monitoring temperature of whole blood during transportation and storage

No preconditioning

Push-button activation

Easy to interpret

SAFEGUARD™ SLIDE LABELS **NEW**

Prevent Medical Errors by Protecting Patient ID Data

SafeGuard™ thermal labels are engineered specifically for use in histology labs to ensure barcodes and text remain crisp through multiple chemical treatment cycles.

Prevent barcode degradation and adhesive oozing that can lead to misidentification

Highly resistant to the chemicals used to wash out staining reagents to keep identification information intact — resistant to xylene, hexane, staining reagents, alcohol, acetone, and more

Efficient, one-step thermal printing with no need for an overlay or etching system

SECURLINE® BARCODE BLOOD BANDS **Customizable**

Meet Joint Commission One-Person Verification Requirements

These blood bands are designed to streamline the blood transfusion process and improve patient safety by reducing human errors.

Satisfy the Joint Commission's requirements for a one-person verification process

Barcode technology helps prevent misidentification caused by human error

Increase workflow efficiency

Accurately match the patient to the correct blood, ensuring safety throughout the blood transfusion process

Compatible with existing blood bank system — no IT involvement or capital investment

CODE® BARCODE READERS **NEW**

Simplify Track & Trace with Tech-rich, Lab-ready Scanning Solutions

NEAR-ZERO MISS SCANNING Read any specimen label in any condition on curved, soiled, and shiny surfaces — patented scanning tech won't slow your techs

DATA PARSING Via JavaScript, these scanners pull specified data from one (or multiple) barcodes in one scan — streamlining sample registration and documentation

CODESHIELD® PLASTICS Disinfectant-ready plastics outlast “antibacterial plastics” by withstanding routine sanitation and healthcare-grade cleaners — devices won't yellow, crack or fail prematurely

SIMPLY SCALABLE Remote firmware updates keep devices current — greater convenience, greater value

IN STOCK Mission-critical barcode readers are ready to ship — stop waiting, start scanning

PDC CERTIS® DIRECT THERMAL PRINTERS

Efficient, Crisp Label Printing — Compact with Mobile Options

PDC thermal printers complete the lab's label solution, allowing lab personnel to quickly print high quality labels at point of care.

Seamless EMR integration with Epic, Cerner, MediTech, and more

Reliable performance validated by thousands of hours of testing

Industry's most competitive printer warranties of up to 3 years

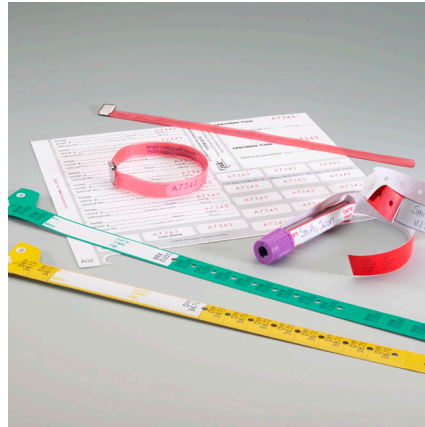

Guaranteed to ensure 100% customer satisfaction

CUSTOM SOLUTIONS & ASSET TRACKING

As a manufacturer, PDC can produce custom solutions to help your lab be more efficient, safe, and compliant. This includes custom labels, wristbands, and bags, or more complex solutions such as RFID tags to track your lab assets throughout your facility.
